

Question 1

Consider the following set: {"A","A"}, what will the result be when the set is created? 1 / 1 point

**{"A"}**

{"A","A"}

Correct

correct, there are no duplicate values in a set

Question 2

What is the result of the following: type(set([1,2,3])) 1 / 1 point

**set**

list

Correct

correct, the function set casts the list to a set before we apply the type function

Question 3

What method do you use to add an element to a set? 1 / 1 point

append

**add**

extend

Correct

Question 4

What is the result of the following operation : {'a','b'} & {'a'} 1 / 1 point

**{'a'}**

{'a','b'}

Correct

Correct, the intersection operation finds the elements that are in both sets.
